ECR 658-15**

Medical Intuition, used throughout history by gifted physicians to perform health evaluations, is emerging as a new science within the field of Energy Medicine. Intuition is the foundation for all creativity and for one's health and happiness. All of us have intuitive survival skills and we can optimize these to enhance our connections to our Higher Self and Purpose in Life. The emerging science of intuition suggests that regardless of your path in life, intuition should be an integral component, enabling you to reach your potential. Developing your intuition can make your life happier, healthier, easier, more productive, and more successful.

This experiential program requires no prior experience and is open to all. Explore a wide variety of techniques and tools designed to provide and expand your natural intuitive and healing abilities, including:

- **The origins of dis-ease and the role of illness as a metaphor**
- **Intuition as the foundation for health and healing**
- **Intuiting your strengths and weaknesses and removing personal roadblocks to healing**
- **The essential role of prayer, reflection, and contemplation in healing**
- **Managing stress, alleviating depression, and improving self-esteem for optimal wellness**
- **Healing as a mystical experience**

Experience breakthrough techniques for awakening your inner medical intuitive and applying the power of your innate healing abilities, for yourself and others. Fine-tuning your inner listening abilities and interpretive skills can often lead to startling insights and transformative knowledge. Getting a medical intuitive diagnosis from an outsider is not nearly as important as having a personal intuitive “aha!” about your situation for yourself! So come spend the day with renowned holistic health pioneer Dr. Shealy as he leads YOU to wholeness.
